

## Why choose B&L's implant scaler tip?

### Metallic ultrasonic tip designed for scaling of polished implant surfaces

Compatibility with electric piezo unit  
Optimal scaling efficiency with minimal abrasiveness  
to the external polished surface of the implant.

### Ideal Periodontal Management of Implant

With B&L's IS Tip, plastic and titanium implant  
currettes are now obsolete.

### Ideal solution for complete removal of residual cement

\* IS Tip is a disposable item.

# What an ideal solution for peri-implantitis !!

Smart choice for implant scaling

# IS Tip

**B&L IS Tip: Indications and Advantages**

- ① Ideal for periodontal maintenance of the implant
- ② Ideal for treatment of the peri-implantitis
- ③ Ideal for excess cement removal
- ④ B&L IS Tip's unique material causes deformation on the tip, NOT on the porcelain or ceramic restoration surfaces.

\* IS Tip is a disposable item.
